

Survey-Based Triangulation of Event Awareness and Perceived Platform Control

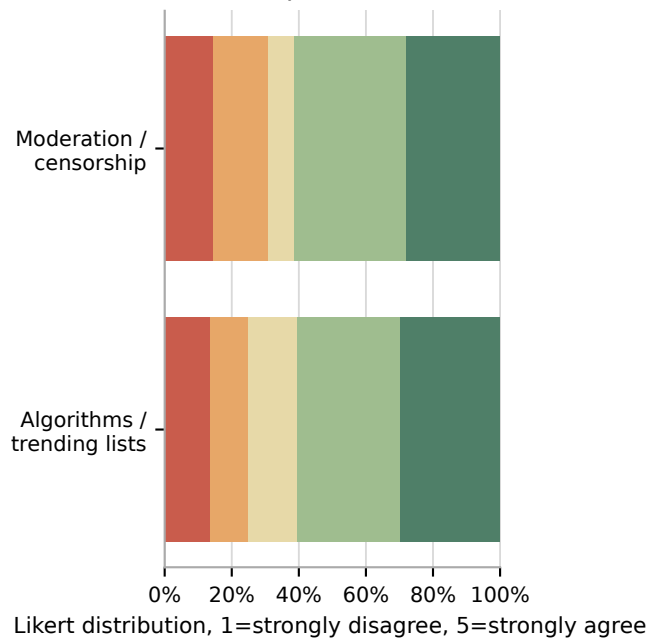

(a) Event familiarity

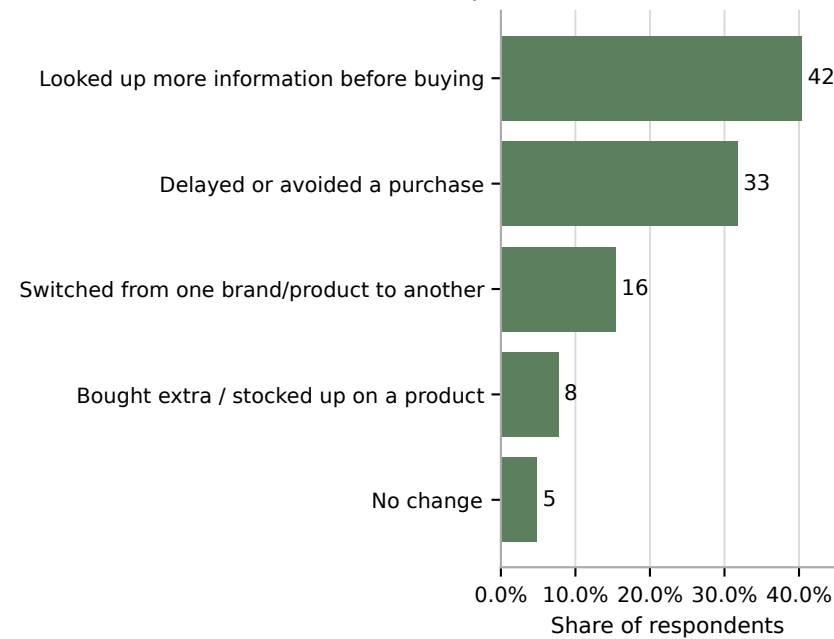

(b) First source of awareness

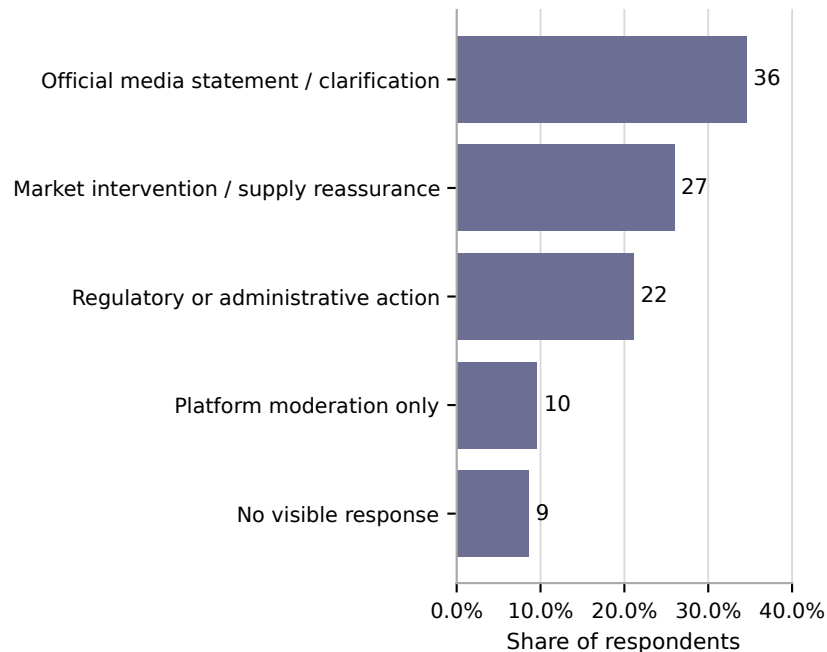

(c) Perceived platform-control role

(d) Reported consumer-behavior spillover

(e) Expected government response

Survey note

N = 104 respondents. Percentages are based on all survey responses. Event familiarity allowed multiple selections; other panels use single-response items. The survey is used as perception-based triangulation, not as a nationally representative measure.
